

Worship Safety

at Bismarck United Church of Christ

Know the symptoms of COVID-19: fever (>100.4 F), cough, shortness of breath, body aches, chills, loss of taste/smell.

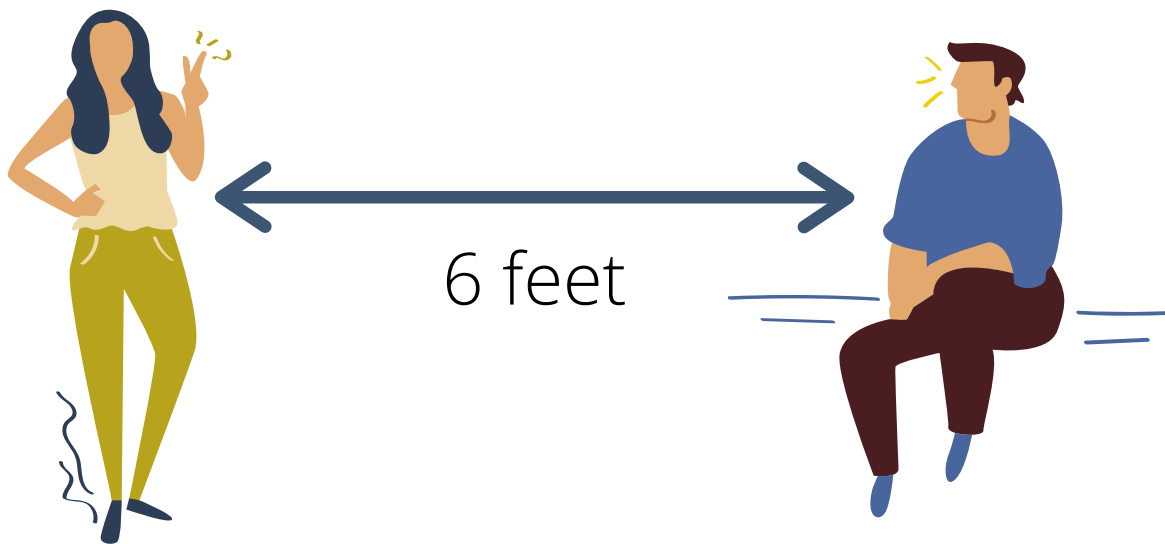

Protect others by monitoring your family's symptoms and taking temperatures BEFORE coming to church.

Stay home if you are ill and worship online.

While worshipping in-person:

Be prepared for a modified worship experience.

Maintain physical distancing of 6 feet. Every other pew is roped off to promote distancing.

Wear a mask while at church. Masks will be available for visitors, but we strongly encourage everyone to bring their own mask.

Practice good hygiene. Wash hands with soap and water for at least 20 seconds. Hand sanitizer stations are available around the church. Avoid touching your face.

Protect others. Contact your medical provider and ask to be tested if you are ill. Notify the church office if you test positive for COVID-19 and have been to church in the past 2 weeks.
